
ABOUT

- Android developer with an eye for good design, user experience and love for open source.
- With an experience of 5.5 years, I have worked with organizations of various sizes at varying stages; gathering a variety of experiences.

EXPERIENCE

Bennett Coleman and Company Limited - CouponDunia

February 2018 - April 2020

*Senior Android Developer**Mumbai, India**Part of couponing business. A coupons and deals website that connects online shoppers with e-commerce merchants.*

- Creating, editing and managing server side APIs, written in PHP, for mobile apps.
- Lead complete redesign of the CouponDunia app.
- Took initiative & lead migration to MVP architectural pattern.
- Initiated Kotlin adaptation by implementing new features in Kotlin and Kotlin coroutines
- Awarded "Special Thanks And Recognition Award" for my work on app's Shopping Assistant feature.
- Managed bugs and feature update on CashBoss app

Guesthouser

January 2016 - January 2018

*Android Developer**Gurugram, India**A travel startup that helps connect home owners with accommodation seekers.*

- Part of five member team responsible for the primary app and internal apps - Offline Discovery & Photography app.
- Designed and implemented a complex, multilevel, dynamic form whose structure and input types could be controlled via server.
- Implemented tracking feature that standard tools (Google Analytics & Fabric) lacked; increasing the understanding of user behavior.

Cerno Technologies

July 2014 - December 2015

*Software Engineer - Android**Gurugram, India**A startup providing enterprise technology solutions for businesses; Developing both Mobile and Web applications.*

- Key team member for two proprietary products - LexRex and CtLive. Contributed to the full app development lifecycles.
